Occupier  
Bedford High School

Location  
Bromham Road  
Bedford

Type  
Education

Size  
Sq.m  
sq.ft

Value  
£3.30m

Woods Hardwick were engaged by the client, Bedford High School for Girls to develop proposals for the existing site to provide a new sports hall, swimming pool and theatre facilities following a successful design competition bid.

The design concept knits together the existing building elements to create a cohesive overall strategy for the site.

This is achieved via a glazed 'Street' which forms the unifying link between the new proposals and the existing buildings bringing light and transparency to the internal environment whilst at the same time encouraging the full interaction of its users within the space.

Existing complex site and planning constraints involving listed building & conservation issues were dealt with in the process of ensuring the clients design aspirations were met in producing and delivering the scheme within a tight programme.

The use of sympathetic materials and textures aims to enhance the quality of the immediate environment while responding to issues of maintenance and sustainability.

The proposed phased development will allow the school to operate during the construction period and on completion will provide up to the minute facilities for educational and out of hours community use.
